

ECOLOGY SEMINAR

WINTER SEMESTER 2022

When

Tuesdays
16:20h

Where

Lecture Hall B2
Building B
Branišovská 1760

- 1.11. Robert Tropek** (Dep. of Ecology, Charles University Prague & Biology Centre, CAS)
“Flying between raindrops: Diversity and ecology of butterflies and moths on the rainiest Afrotropical mountain?”
- 8.11. Antonín Machač** (Center for Theoretical Studies, Charles University Prague)
“Evolution of bird diversity in the New World”
- 15.11. Petr Čapek** (Department of Ecosystem Biology, University of South Bohemia)
“A plant–microbe interaction framework explaining nutrient effects on primary production”
- 22.11. Roey Angel** (Soil & Water Research Infrastructure, Biology Centre, CAS)
“Do millipedes depend on their gut microbiome to digest leaf litter?”
- 29.11. Jakub Žárský** (Cryosphere Ecology Group, Dep. of Ecology, Charles University Prague)
“The Cryogenian Cradle of Land Plants – The Role of Large Glaciations in Terrestrialization” (will be in lecture hall B1)
- 6.12. David Richardson** (Centre for Invasion Biology, Stellenbosch University, South Africa)
“Impacts of biological invasions in South Africa: What do we know?”
- 13.12. Tim Harris** (Institute of Botany, CAS, Trebon)
“Allometric scaling in perennial herbs”
